

## High quality service provision and care pathways in Paediatrics: How **YOU** can make a difference

---

**Walsall Hospital** (Manor Learning and Conference Centre)  
**24<sup>th</sup> June 2011**

An interactive conference for trainees and consultants interested in learning how to deliver the best care for children. No prior experience is necessary! Great experience for trainees wanting practical knowledge for their first day as a consultant and also for consultants wanting to learn the skills they weren't taught as a trainee.

### Guest Lectures:

Prof. Sir John Temple - Author, "Time for Training: A review of the impact of EWTD"

Dr. Patricia Hamilton -Director of Medical Education, Department of Health  
"How does training quality reflect on service delivery?"

### Workshops:

A number of workshops will provide education and also the opportunity to feedback and discuss ideas. These will include using data at a local level to evaluate services and how systems can be designed to aid urgent care pathways. All attendees will also participate in an exercise to solve a service delivery problem and receive feedback on their efforts.

### Networking:

The Running Horse Group is a network of paediatricians interested in learning the skills required to improve & develop services for children and young people. We believe every paediatrician should engage with improving the quality and safety of the service they provide. We aim to share with each other improvement tools and practical experiences to ensure all our patients can benefit.
